Study Updates!

We are still recruiting children ages 13-19 with a parent or sibling who has depression, bipolar disorder, or schizophrenia. Feel free to pass this Newsletter along to your friends!

We are recruiting for 4 studies in the ANDP lab! Click here to access our website to find info on our lab and our studies! - http://andp.pitt.edu

What We Know So Far...

We're making great progress, with 135 people in the study so far. We are seeing brain reward regions are activated more when winning money than when there is no reward or loss.

Next Steps for your participation!

Keep a look out for an email with a link to your child's follow-up questionnaires. You will receive them 6 months after your first visit with us.

Please call or text us at 412-589-9013 if you are not sure when your next appointment is or with any questions!

Thank you for your continued participation!

Mental Health Research:

Check out this article on the relationship between maternal/peer relationships and adolescent depression! – Maternal and Peer Regulation of Adolescent Emotion: Associations with Depressive Symptoms.

Click here to read! http://link.springer.com/article/10.1007%2Fs10802-015-0084-x

"The current study showed that a lack of support from both mothers and peers is related to adolescents' depressive symptoms."
